This newly constructed facility in Westby, WI has 15,000 SF of office space, 15,000 SF of warehouse, and 20,000 SF of vehicle storage for a total of 50,000 SF. Tilt-up precast wall panels, thru-wall brick and structural steel, joists and metal deck comprise of the building's structural components. Several green building techniques were incorporated, such as polished concrete floors, geo-thermal loop field, heat pump system for heating and cooling, and 80,000 SF of exterior concrete paving to reduce heat; island effect. This project was started in September of 2008 and was completed in June of 2009.
