

**Skipperliner
Manufacturing and Corporate Office Building
621 Park Plaza Dr.
La Crosse, WI**

**Owner
Skipperliner**

This project is a pre-engineered 47,000 sq. ft. boat manufacturing facility with 40 ft. high side walls. The building also contains three stories of corporate offices inside. Special detail was given to the layout of columns so large boats would be able to be worked on from all sides. The floors were poured at 12" thick because of the high amount of weight per square foot on the concrete floor.
